PROFILE

Fresh BCA graduate specializing in Data Science & AI, with a proven track record of shipping end-to-end analytics products. Built two production grade systems independently: an **HR attrition predictor (89.5% accuracy)** and a **Customer Analytics Platform Processing 302K+ transactions**. Adept at the full pipeline — data wrangling, EDA, ML modelling, and BI dashboarding — with a strong eye for turning raw data into decisions that move the needle.

TECHNICAL SKILLS

Programming & Querying:
- Python (Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn)
- SQL (MySQL)
- Basic Java

Data Analysis & Visualization:
- Power BI (DAX, Data Modeling, Drill-through)
- Excel (Advanced Formulas, Pivot Tables, Power Query)

Machine Learning:
- Supervised Learning (Random Forest, Logistic Regression)
- Customer Segmentation
- Predictive Modeling

Business Analytics:
- KPI Development
- Dashboarding
- Data Cleaning & Transformation
- Exploratory Data Analysis (EDA)
- Reporting & Insights

Databases:
- MySQL (Joins, Subqueries, Aggregation)
- NoSQL (Basic Understanding)

PROJECTS

EAAS — Employee Attrition Analysis System | Python, Power BI, Streamlit, Machine Learning | (Github)
- Engineered and benchmarked Logistic Regression vs Random Forest classifiers on a 1,470-record, 35-feature IBM HR dataset — achieving 89.5% accuracy and real-time risk scoring with probability confidence output via Joblib serialisation.
- Delivered a dual-platform BI system: a Power BI executive dashboard (attrition trends, salary bands, satisfaction heatmaps, employee risk drill-through) paired with a fully deployed, multi-page Streamlit web app — covering the complete data pipeline from raw ingestion through feature engineering to live prediction.

Customer Purchase Behavior Analyzer (CPBA) | Python, Streamlit, Scikit-Learn, Plotly | (Github)
- Architected a 6-module analytics platform (executive KPI dashboard, RFM segmentation, ML spending predictor, geo-BI explorer) handling a 302K-row, 30-feature dataset spanning 86K+ customers across 5 countries and 5 product categories.
- Applied K-Means clustering on RFM-engineered features to surface distinct customer behavioural segments; deployed a Scikit-Learn regression model for real-time spend prediction, wrapped in a polished Streamlit app with Plotly visuals and custom CSS theming.

Customer Lifetime Value Analytics Platform | Python, Streamlit, Scikit-Learn, Plotly | (Github)
- Architected and deployed EliteCLV, an enterprise Streamlit BI dashboard analyzing CLV, retention, and behavioral patterns across 150K+ customer records; implemented RFM segmentation, cohort analysis, and churn prediction using SQLite database with modular analytics pipeline.
- Full-Stack Analytics System: Engineered multi-layer architecture encompassing ETL preprocessing, SQL schema management, authentication handlers, and 8 specialized dashboard modules (Revenue, Churn, Behavioral, Segmentation, RFM, Cohort); optimized data pipeline processing 5.9MB+ customer datasets with reusable Plotly visualization components.

CERTIFICATES & TRAINING

IBM Certifications
- IBM Data Science 101 (DS0101EN) – Foundations of Data Science concepts and workflows
- IBM Python for Data Science (PY0101EN) – Data analysis using Python libraries
- IBM Machine Learning with Python (ML0101EN) – Supervised and unsupervised learning basics
- IBM Predictive Modeling Fundamentals I (PA0101EN) – Model building and evaluation concepts
- IBM NoSQL and DBaaS 101 (DB0151EN) – Modern database systems and cloud-based storage

Data Analyst Training - NIELIT, Lucknow
Data Analyst Training | NIELIT, Lucknow *(Govt. of India, MeitY) Jan 2026 – Apr 2026 · 3 months*

ACADEMIC QUALIFICATIONS

Bachelor of Computer Applications (BCA) Specialization: Data Science & Artificial Intelligence, *Babu Banarasi Das University (BBDU), Lucknow* — 2023 – May 2026, Lucknow

Intermediate (Class XII), CBSE Board, *LFCS (MAU)* — 2021

High School (Class X), CBSE Board, *MMD (Ballia)* — 2019
