PROFESSIONAL SUMMARY

Fresh BCA graduate specialising in Data Science & AI, with a proven track record of shipping end-to-end analytics products. Built two production-grade systems independently: an **HR attrition predictor (89.5% accuracy)** and a **customer analytics platform processing 302K+ transactions**. Adept at the full pipeline — data wrangling, EDA, ML modelling, and BI dashboarding — with a strong eye for turning raw data into decisions that move the needle.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn) • SQL (MySQL) • Java (Basic DSA)
Visualization: Power BI (DAX, Data Modeling, Drill-through) • Plotly • Excel (Pivot Tables, Power Query)
Machine Learning: Random Forest • Logistic Regression • K-Means Clustering • Predictive Modeling • RFM Analysis
Analytics: EDA • KPI Development • Dashboarding • Data Cleaning & Transformation • Business Reporting
Databases: MySQL (Joins, Subqueries, Aggregation) • NoSQL (Basic)
Tools: Streamlit • Joblib • Git/GitHub • Jupyter Notebook • VS Code

PROJECTS

Employee Attrition Analysis System (EAAS) | Python • Power BI • Streamlit • ML

[GitHub](#) ↗

- Engineered and benchmarked **Logistic Regression** vs **Random Forest** classifiers on a 1,470-record, 35-feature IBM HR dataset — achieving **89.5% accuracy** and real-time risk scoring with probability confidence output via Joblib serialisation.
- Delivered a **dual-platform BI system**: a Power BI executive dashboard (attrition trends, salary bands, satisfaction heatmaps, employee risk drill-through) paired with a fully deployed, multi-page **Streamlit web app** — covering the complete data pipeline from raw ingestion through feature engineering to live prediction.

Customer Purchase Behavior Analyzer (CPBA) | Python • Streamlit • Scikit-Learn • Plotly

[GitHub](#) ↗

- Architected a **6-module analytics platform** (executive KPI dashboard, RFM segmentation, ML spending predictor, geo-BI explorer) handling a **302K-row, 30-feature** dataset spanning 86K+ customers across 5 countries and 5 product categories.
- Applied **K-Means clustering on RFM-engineered features** to surface distinct customer behavioural segments; deployed a Scikit-Learn regression model for real-time spend prediction, wrapped in a polished **Streamlit app** with Plotly visuals and custom CSS theming.

EDUCATION

BCA – Data Science & Artificial Intelligence

2023 – May 2026

Babu Banarasi Das University (BBDU), Lucknow

Intermediate (Class XII) – CBSE

2021

LFCS, Mau

High School (Class X) – CBSE

2019

MMD, Ballia

CERTIFICATIONS & TRAINING

Data Analyst Training | NIELIT, Lucknow (Govt. of India, MeitY)

Jan 2026 – Apr 2026

IBM Certifications:

- [Data Science 101 \(DS0101EN\)](#)
- [Python for Data Science \(PY0101EN\)](#)
- [Machine Learning with Python \(ML0101EN\)](#)
- [Predictive Modeling Fundamentals I \(PA0101EN\)](#)
- [NoSQL & DBaaS 101 \(DB0151EN\)](#)
